RE: Interim Status Acknowledgement  
FACILITY NAME: BASF Wyandotte Corporation

USEPA ID No. MID064197742

Dear Mr. Fry:

This is to acknowledge that the U.S. Environmental Protection Agency (USEPA) has completed processing your Part A Hazardous Waste Permit Application. It is the opinion of this office that the information submitted is complete and that you, as an owner or operator of a hazardous waste management facility, have met the requirements of Section 3005(e) of the Resource Conservation and Recovery Act (RCRA) for Interim Status. However, should USEPA obtain information which indicates that your application was incomplete or inaccurate, you may be requested to provide further documentation of your claim for Interim Status. Our opinion will be reevaluated on the basis of this information.

As an owner or operator of a hazardous waste management facility, you are required to comply with the interim status standards as prescribed in 40 CFR Parts 122 and 265, or with State rules and regulations in those States which have been authorized under Section 3006 of RCRA. In addition, you are reminded that operating under interim status does not relieve you from the need to comply with all applicable State and local requirements.

The printout enclosed with this letter identifies the limit(s) of the process design capacities your facility may use during the interim status period. This information was obtained from your Part A Permit application. If you wish to handle new wastes, to change processes, to increase the design capacity of existing processes, or to change ownership or operational control of the facility, you may do so only as provided in 40 CFR Sections 122.22 and 122.23.

As stated in the first paragraph of this letter, you have met the requirements of 40 CFR Part 122.23; your facility may operate under interim status until such time as a permit is issued or denied. This will be preceded by a request from this office or the State (if authorized) for Part B of your application. Please contact Arthur Kawatachi of my staff at (312) 886-7449, if you have any questions concerning this letter or the enclosure.

Sincerely,

Karl J. Klepitsch, Jr., Chief  
Waste Management Branch

Enclosure

Re: RCRA Hazardous Waste Permit, EPA ID # MID 064 197 742

Gentlemen:

BASF Wyandotte Corporation (BWC) has submitted a hazardous waste permit application for BWC's facility in Wyandotte, Michigan on November 18, 1980. The latest revision to the application has been April 8, 1981. Due to an administrative oversight, an incineration process was inadvertantly omitted from Form 3, Part III.

The incinerator was constructed in 1975 and is permitted under Wayne County Air Permit Number APC 0-00460.

BWC hereby submits an amended complete application. Please replace this application form and attachments for the previously submitted information currently on file.

Very truly yours,

Keith Fry, Director  
Corporate Environmental Protection
